

Objective: Your task is to create a web form for collecting trainee details for an internship certificate. You should build this form using HTML and CSS. Follow the instructions and requirements below:

Instructions:

Create the following input fields within the form:

A text input for "Trainee ID."

A text input for "Mentor Name."

A date input for "From Date."

A date input for "To Date."

A date input for "Submitted On."

Add appropriate labels for each input field.

Style the Form Elements:

Ensure that input fields and labels are styled according to the CSS.

Add the Submit Button:

Create a submit button within the form. The button should have the text "Submit."

Add more styling and layout enhancements to make the form visually attractive.

Experiment with additional CSS properties to customize the form further.
