

Objective: To build a success page for a certificate generation form.

Requirements:

The success page should be a simple HTML page with the following elements:

A title tag with the text "Success Page"

A heading with the text "Form submitted successfully."

A paragraph with the text "Thank you for submitting dates for certificate generation."

A footer with the copyright information "© 2023 Myshow4all. All Rights Reserved."

It should have html entity for thumbs up sign.

The success page should be styled using CSS. The CSS should include the following rules:

The body element should have the following properties:

Content should be aligned center.

It should have background-color with the code #f0f0f0 and margin: 0

The footer element should have the following properties:

text-align: center

background-color: #333

color: white

padding: 10px

width: 100%

bottom: 0

Instructions:

Create a new HTML file and save it as certificate-dates-success.html.

Create a new CSS file and save it as certificate-dates-success.css.

Provide the association or link between certificate-dates-success.html and certificate-dates-success.css files using <link> element.

.

Verify that the success page is displayed correctly and that the CSS styling is applied.

Additional notes:

You can also add additional CSS styling to the success page to achieve the desired look and feel.
