Task Assignment Title: Enrolment Form Submission Success Page

Objective: Develop a web page that displays a success message for an enrolment form submission. This assignment will test your HTML and CSS skills.

Instructions for Trainees:

1. HTML Structure:

  - Create an HTML file named `enrolment-form-success.html`.

  - Start with the HTML5 `<!DOCTYPE html>` declaration.

  - Create an `<html>` element with the `lang` attribute set to "en".

  - Create a `<head>` section.

  - -Inside the `<head>` section:

  - ---Add a `<title>` element with the text "Success Page".

  ---- Link an external CSS file

  - Create a `<body>` section.

2. CSS Styling:

  - Style the `<body>` element to:

    - Use flexbox to centre content vertically and horizontally.

    - Set a background colour of your choice.

    - Remove the default margin.

  - Create a CSS class called `.content` and style it to:

    - Centre text horizontally.

    - Set the text colour to green.

    - Add some margin at the bottom.

  - Style the `<footer>` section to:

    - Centre text horizontally.

    - Set a background colour.

    - Set the text colour to white.

- Add padding to give it some space.

- Make it stick to the bottom of the page (position it absolutely at the bottom).

3. Content:

- Inside the `<body>`, create a `<div>` element with the class "content".

- Inside the `<div>`, add an `<h2>` element with the text "Enrolment Form submitted successfully."

- Below the `<h2>`, add a `<p>` element with a thank you message.

4. Footer:

- After the `<div>` with class "content," create a `<footer>` section.

- Inside the `<footer>`, add a copyright notice (e.g., "© 2023 Myshow4all. All Rights Reserved.").

5. Check List:

- Ensure that the page displays properly in a web browser.

- Make sure the page content is centered both horizontally and vertically.

- Check that the footer sticks to the bottom of the page.

- Validate your HTML and CSS for any errors.

6. Submission:

- Test the pages in multiple web browsers to ensure compatibility.

7. Grading Criteria:

- Proper HTML structure and syntax.

- Correct CSS styling as specified.

- Content is centered and visually appealing.

- Footer sticks to the bottom of the page.

- Submission of HTML and CSS files.
