Objective:

Your task is to create a Project Lead Dashboard using HTML and CSS. The dashboard should display key information and provide navigation for different menu items.

Instructions:

Header:

Create a header with a level 1 heading "Project Lead Dashboard."

Inside the header, include a navigation bar with the following items:

- ✓ Home:
- ✓ Tasks: (with sub-items: View All Tasks Assigned, View Pending Tasks, View Tasks by Assignee, View Tasks by Priority, Create New Task, Edit Task, Delete Task)
- ✓ Feedback: (with sub-items: View All Feedbacks Provided, View Feedback by Trainee, View Feedback by Type (Positive, Negative, Constructive), Provide Feedback, Edit Feedback, Delete Feedback)
- ✓ Activity: (with sub-items: View Team Member Activity, View Task Activity, View Feedback Activity)
- ✓ Reports:

Footer:

Create a footer with a copyright notice, e.g., "© 2023 Myshow4all. All Rights Reserved."

Styling:

Apply appropriate styling to make the dashboard visually appealing. Use the provided CSS styles as a reference and feel free to enhance the styles as needed.

Notes:

Ensure that the navigation links are properly structured and functional.

Test the dashboard layout on different screen sizes to ensure responsiveness.
