Task Assignment:

Objective: The objective of this assignment is to develop a form for capturing student details.

Task: You are required to create a form using HTML and style it using CSS. The form should capture the following fields:

1. Name – alphabet only

2. Course Name – alphabet only

3. Domain – alpha numeric

4. College Name – alpha numeric

5. Contact Number (10-digit numeric input)

6. Email ID – alphanumeric with special characters

The form should be aesthetically pleasing, user-friendly, and responsive to different screen sizes.

Requirements:

1. The form should be designed as per the provided HTML and CSS templates.

2. All form fields should have appropriate labels.

3. Implement validation for the "Contact Number" field to accept only 10-digit numeric input.

4. The "Email ID" field should have email validation.

5. The form should be centered on the page.

6. The form should include a "Submit" button.

Optional Enhancements: Feel free to go beyond the basic requirements to improve the form's functionality or design. You can consider the following enhancements:

1. Implement additional form validation, such as required fields.

2. Improve the form's appearance by customizing the colors, fonts, and layout.

Evaluation: Your assignment will be evaluated based on the following criteria:

1. Correctness of HTML and CSS code.

2. Implementation of form validation.

3. Visual design and user-friendliness.
