Objective: Build a web application that displays a list of trainees and also check-box cell against each of the trainees to be selected.

Instructions:

Your task is to create a web application following the provided HTML and CSS structure. The application should enable users to manage a list of trainees, including selecting trainees using check-box cell. It should have "Delete Selected" button as well.

Requirements:

1. The table should have the column headers like Trainee ID, Trainee Name, Course Name, Internship Domain, College Name, Contact Number, and Email.

2. It will have the button like "Delete Selected."

2. HTML Structure: Create an HTML page by including the necessary HTML elements (e.g., headings, tables, buttons) as per the provided structure.

CSS Styling:

Apply CSS styles to the HTML elements.

Ensure that table and checkboxes are styled.

Enable users to select trainees using checkboxes.

Checklist:

Thoroughly test the application to ensure that:

Checkboxes work correctly.

Selected trainees are tracked accurately.
